

42 · The Cheapest Query Compu

The Cheapest Query Computes Nothing

01 · THE IDEA

The cheapest query is the one that doesn't compute anything.

42 · The Cheapest Query Compu

The Cheapest Query Computes Nothing

02 · HOW IT WORKS

CryptoPrism's on-chain metrics are materialised as BigQuery views, not recomputed per request. The expensive work runs o

42 · The Cheapest Query Compu

The Cheapest Query Computes Nothing

03 · WHY IT MATTERS

That single choice is most of the answer to how a \$107/mo infrastructure bill supports 1,000+ coins and 17 chains. Recom
