

You don't need to be a DBA to **read a query plan.**

THE PROMISE

about twenty minutes changes how you judge infra costs

A plan tells you what the DB **is about to do.**

SCAN OR INDEX

full table scan or index lookup

PASSES

one pass or five joins

CACHE

cached or computed fresh

QUERY PLANS · 03/03

Most cost surprises trace back to **a plan nobody read.**

THE MISTAKE

right answer got treated as right answer, efficiently

THE PROOF

CryptoPrism's \$0.004 to \$1.76 spread came from reading plans
